

Paypoint.

Paypoint — UX/UI Design System & MVP Screens

The indigo-led, Stripe-clean design language for Paypoint's 2-week MVP — one calm, trustworthy system carrying a stranger from a shared link to a completed payment.

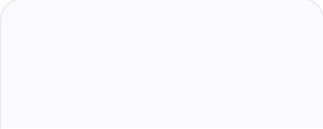

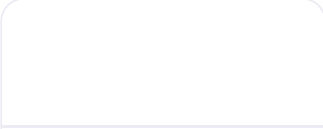

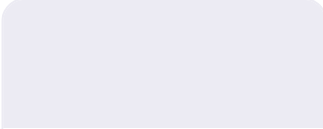

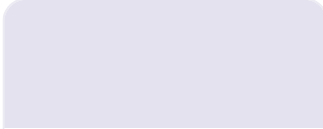

v1.0 · Newman Haruna · for Yvonne Joseph · 16 June 2026

FOUNDATIONS

Design system

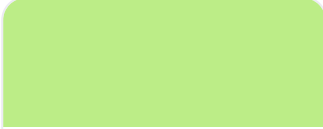

Every product surface is built from these tokens. Indigo leads; the secondary palette appears only as brand expression (doc chrome, illustration, empty-state art) — never as a second accent competing with indigo in product chrome. Type is Inter only. Separation is done with 1px borders, not shadows.

COLOR TOKENS

 --brand #5F58F4	 --brand-hover #4A43D6	 --brand-tint #EEEDFE	 --brand-soft #F5F4FF
 --ink #14132B	 --text #33323F	 --muted #6C6B7B	 --subtle #9A99A8
			

--bg-soft #FAFAFE	--surface / --bg #FFFFFF	--border #ECEBF3	--border-strong #E3E2EE
			
--success #12B76A	--warning #F79009	--danger #F04438	--star #F5A623

SECONDARY BRAND PALETTE · EXPRESSION ONLY

			
--deep-teal #093D3D	--mint-green #4CA672	--spring-green #BCED87	--mustard #FFD071

TYPE SCALE · INTER

PROTOTYPES

Screen by screen

All 10 in-scope screens in priority order, each rendered inside a 375px phone frame. Checkout is #1 and most detailed — it owns the North Star of ≥40% conversion. Nothing out-of-scope appears: no KYC, wallet, storefront, edit-page, search, or multi-currency. NGN only.

PRIMARY JOB

- Carry a **stranger** from a shared link to a completed payment with zero hesitation. Owns the $\geq 40\%$ North Star.
- Chrome-free, single-column, one obvious action: **Pay ₦X**.

TRUST & CRO (P0)

- **Real-photo** over placeholder icon — the single biggest conversion lever.
- **"Payments processed by Paystack"** line directly under the button.
- Honest **social proof** ("24 paid") — hidden entirely at 0 rather than faked.
- **Tappable seller contact** (WhatsApp / Instagram) lowers stranger risk.

KEY ELEMENTS

- Seller logo + business name + "Secure" cue in header.
- Real product photo (or branded neutral state), title, muted description, large ₦ price.
- Meta row: delivery + honest "★ N paid" (hidden at 0).
- Collected fields (Name default), full-width indigo Pay button.

MOBILE @375PX & A11Y

- Designed at 375px first; survives WhatsApp/IG in-app browsers.
- Pay button 48px tall — exceeds 44px touch target.
- Price uses real text (screen-reader friendly), not an image.
- Photo carries descriptive alt; "Secure" pairs icon + text.

[📞 WhatsApp](#)

Trust triggers, left → right: (1) seller's own logo + name builds first-party credibility; (2) the **"Secure"** lock reassures before scroll; (3) a **real photo** — not a placeholder icon — is the #1 conversion lever; (4) honest **"24 paid"** social proof, shown only when true (right phone has 0, so it is hidden, not faked); (5) the **Paystack** line under the button answers "is my money safe?" at the moment of decision; (6) **tappable seller contact** de-risks paying a stranger. The right phone shows the **branded neutral state** for pages with no photo — Paypoint wordmark on soft indigo, never a grey placeholder icon.

2 Paystack redirect interstitial

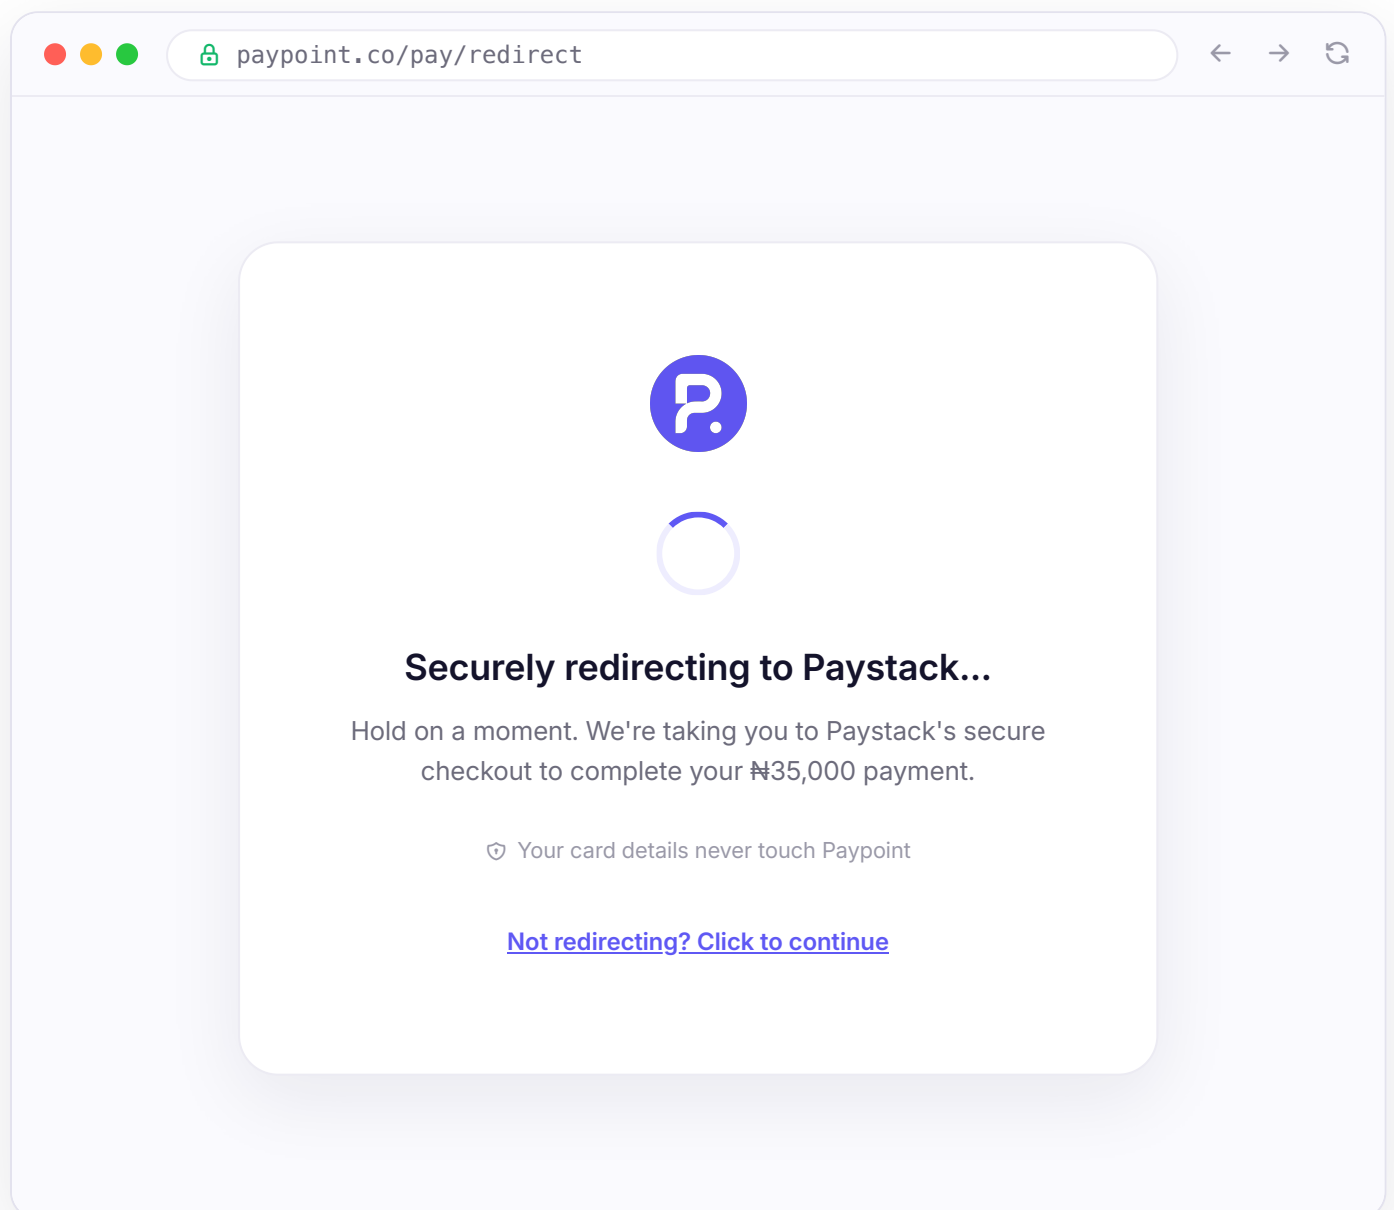

PRIMARY JOB

- Hold the buyer's confidence during the jump to Paystack's hosted page — the riskiest second in the funnel inside an in-app browser.

TRUST & A11Y

- Calm spinner, explicit "Securely redirecting to Paystack..." copy, no dead-end if redirect stalls (fallback link).
- `aria-live="polite"` status announces the redirect; spinner has reduced-motion fallback.

DESKTOP · WEB

9:41

Securely redirecting to Paystack...

Hold on a moment. We're taking you to Paystack's secure checkout to complete your ₦35,000 payment.

 Your card details never touch Paypoint

[Not redirecting? Tap to continue](#)

3 Receipt `/pay/receipt/:reference`

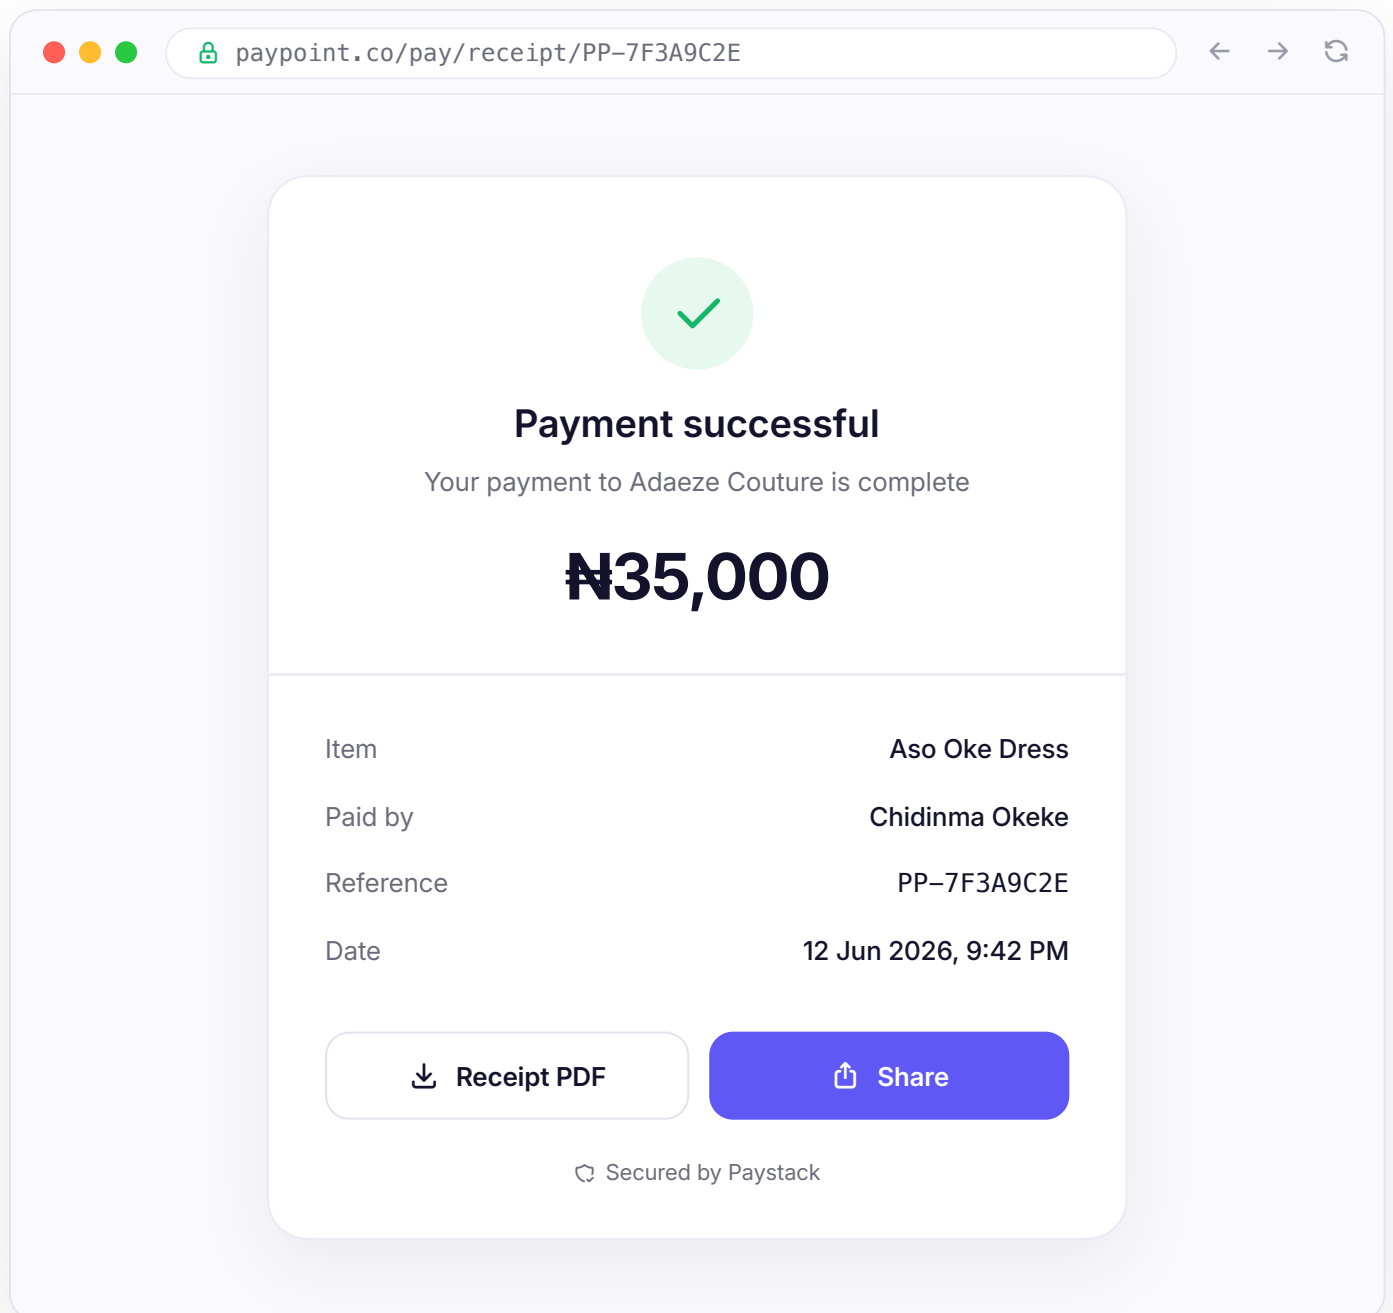

PRIMARY JOB

- Confirm money moved and give the buyer something to keep — proof for a stranger transaction.
- Lives at a **stable reference URL** that survives a closed tab ($\geq 98\%$ receipt-reach metric).

KEY ELEMENTS / STATES

- Success: green check, amount, item, paid-by, reference, date; **Download PDF + Share**.
- Failed: "payment didn't go through" with a clear **Try again** path back to checkout.
- Secured-by-Paystack footer carries trust past the payment.

Create-page builder

[/create](#)

PRIMARY JOB

- Let a seller publish a payment page in **under 90s** with a live preview that removes doubt.

MOBILE @375PX

- On mobile the live preview **collapses above the form** as a sticky thumbnail; desktop shows it side-by-side.

KEY ELEMENTS

- Product/Service toggle, title, ~~¥~~ price, photo upload with **real-photo nudge**, description, delivery.
- Buyer-field checkbox pills (**Name default**; Phone/Email/Address optional).
- Live preview + success panel with **Copy / QR / Share**.

A11Y

- Every field has a real `<label>`; toggle and pills are keyboard-operable with visible focus.

Desktop variant: form (left, ~1.15fr) and live checkout preview (right, ~1fr) sit side-by-side, the preview updating on every keystroke — exactly the existing builder mockup. The mobile frame collapses the preview into the sticky thumbnail shown above so the form stays the focus on a 375px screen.

5 Settings /settings

PRIMARY JOB

- Connect Paystack (provision the seller's **Subaccount**) and set business identity (name + logo).

KEY ELEMENTS / TRUST

- Prominent **"Paypoint never holds your money — it settles to your bank via Paystack"** explainer.
- Connect-Paystack state changes to "Connected" with a green check once the Subaccount exists.
- Business name, logo upload, sign out.

6 Pages grid /pages

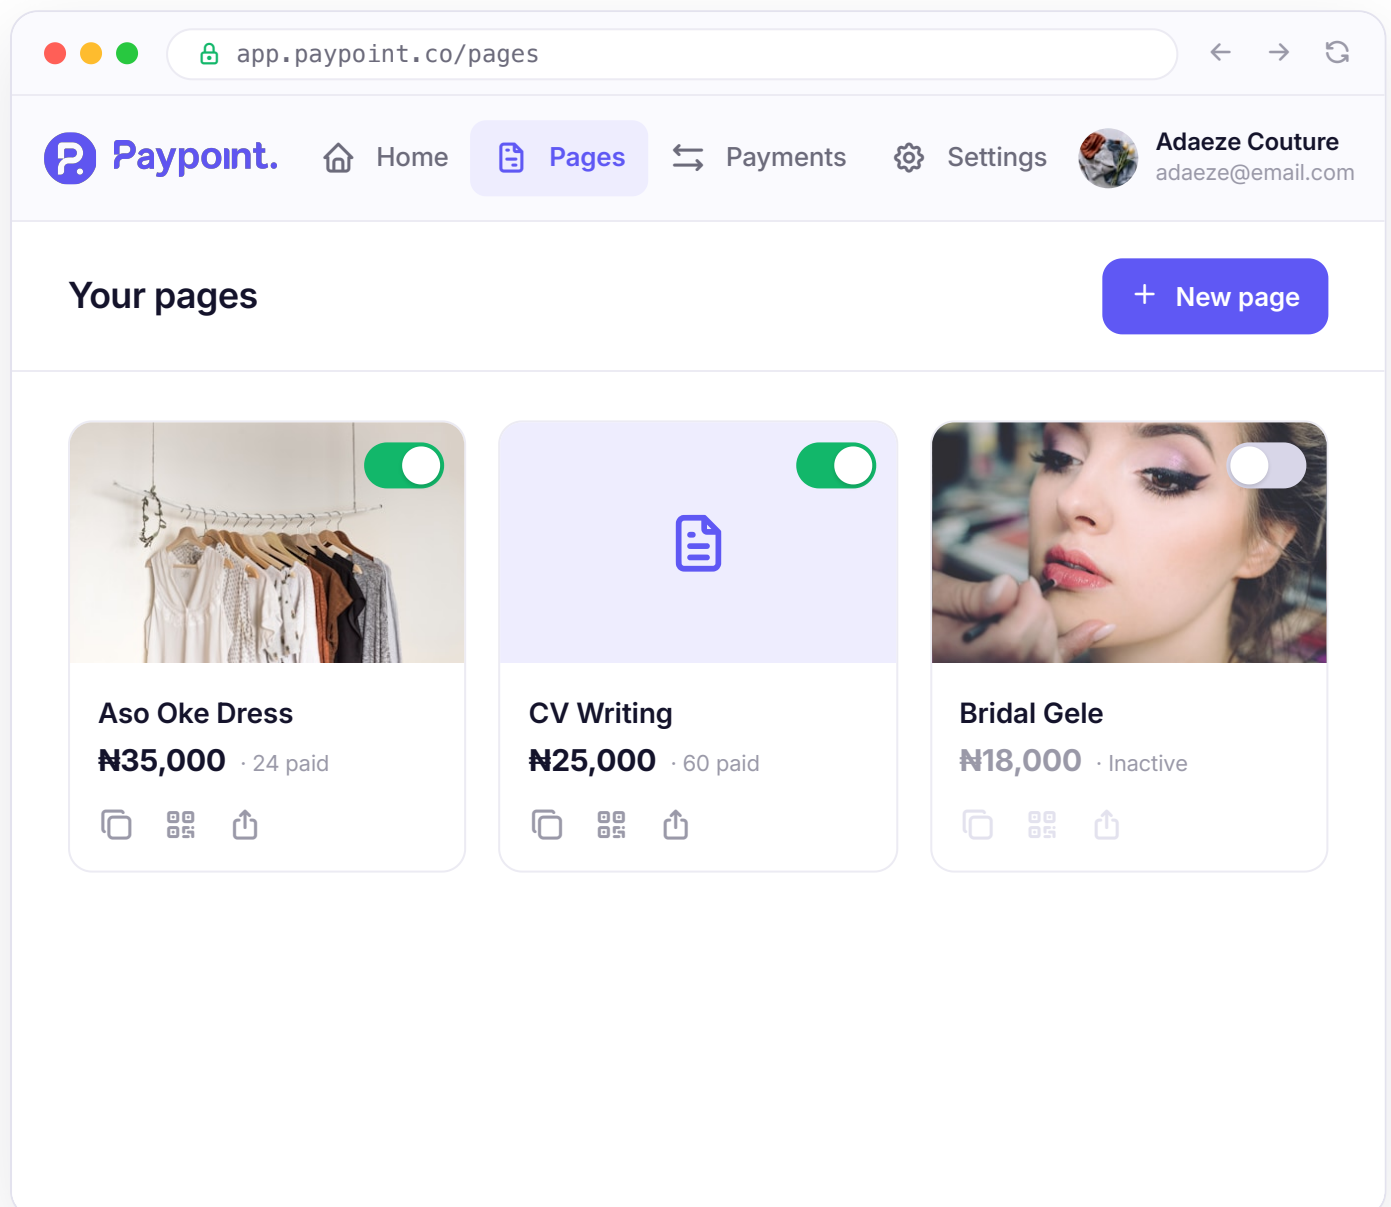

PRIMARY JOB

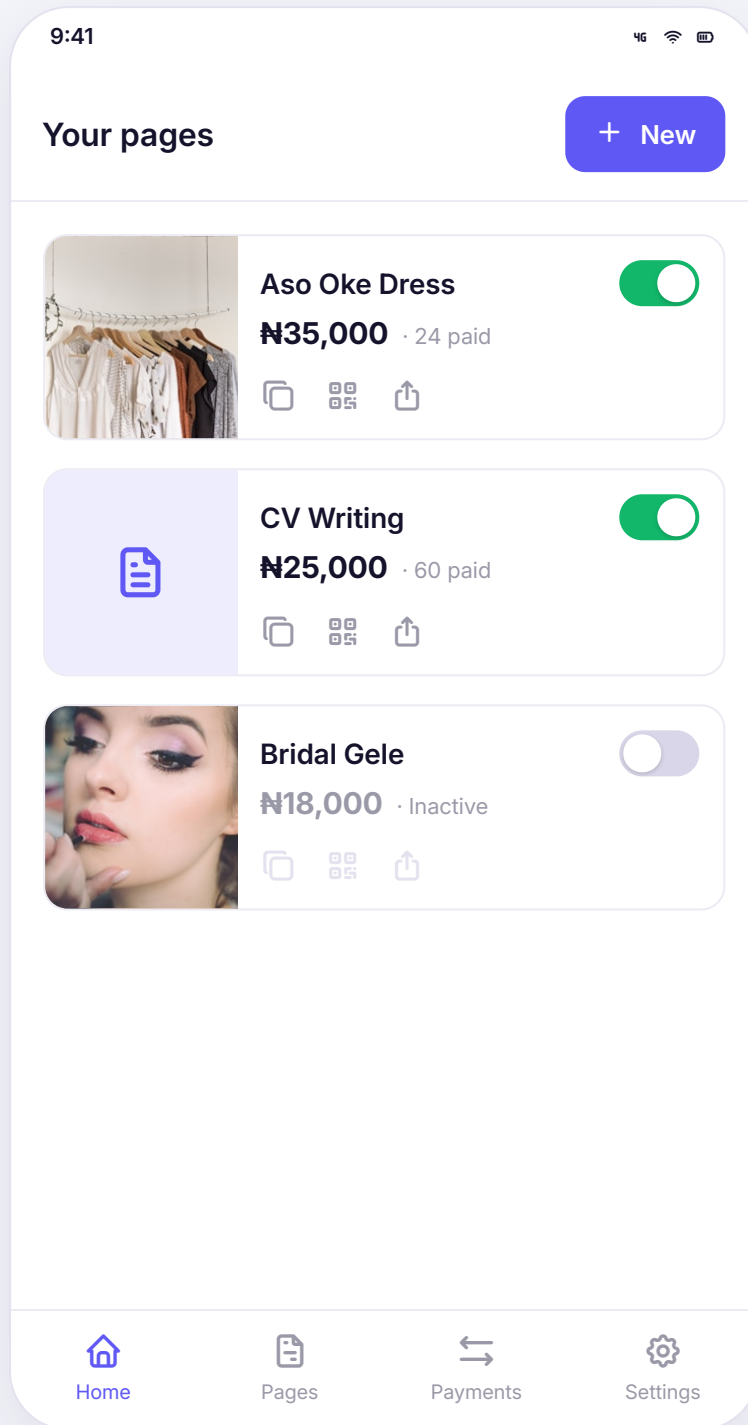

- Manage live payment pages: see each one's true paid-count, flip active/inactive, and re-share fast.

KEY ELEMENTS

- Cards: thumb, title, price, **true paid-count**, active/inactive switch, Copy/QR/Share.
- **No edit affordance** — editing is off at launch (Week 3–4 fast-follow).
- Friendly **empty state** for first-time sellers.

DESKTOP · WEB

9:41

Your pages

No pages yet

Create your first payment page in under a minute
and share the link to get paid.

+ Create your first page

Note: there is deliberately no edit/pencil icon on these cards — edit-page is out-of-scope for the 2-week MVP.
Inactive pages dim their price and disable the share row.

7 Dashboard home /dashboard

PRIMARY JOB

- Give the seller a one-glance "is it working?" — money in, this month, active pages — and an obvious way to create more.

KEY ELEMENTS

- Greeting, three metric cards (**Total collected / This month / Active pages**).
- Recent payments list + prominent **Create Paypoint** CTA.

Recent payments

Chidinma Okeke Aso Oke Dress	₦35,000	Paid
Tunde Akin CV Writing	₦25,000	Paid
Ngozi Eze Bridal Gele	₦18,000	Pending

Brand note: the "Total collected" hero metric is filled solid indigo — the one place a colored fill earns its weight, anchoring the "is it working?" answer. The other two metrics stay calm on —bg—soft so indigo never competes with itself.

8 Payments list /payments

PRIMARY JOB

- A trustworthy ledger of every payment with an honest status. **No search/filter** (out of scope).

KEY ELEMENTS / A11Y

- Status pills: **success** / **pending** / **abandoned** / **failed** — color paired with text, never color alone.
- Mobile renders as stacked rows; desktop as a 4-column table.

9 Seller auth /login · /signup

PRIMARY JOB

- Minimal-friction entry: email/password + Google. Profile auto-created on first login.

KEY ELEMENTS / A11Y

- Single column, indigo CTA, Google button as outlined secondary, link to switch login↔signup.
- Inputs labelled; password has show/hide; errors announced inline.

DESKTOP · WEB

The screenshot shows a web browser window with the address bar displaying 'app.paypoint.co/login'. The page content is centered on a light gray background. It features the 'Paypoint.' logo in blue, followed by the heading 'Welcome back' and the subtext 'Log in to your Paypoint account.' Below this are two input fields: 'Email' with the value 'adaeze@email.com' and 'Password' with masked characters and a toggle icon. A prominent blue 'Log in' button is positioned below the password field. A horizontal separator line with the word 'or' in the center follows. Below the separator is a white button with a Google logo and the text 'Continue with Google'. At the bottom, a link 'New here? Create an account' is displayed.

10 Marketing landing /

PRIMARY JOB

- Convert a visitor into a signup by making the value obvious in one screen: turn anything you sell into a payment page.

MOBILE @375PX

- Hero stacks (headline → CTA → preview); how-it-works becomes a vertical 3-step list.

KEY ELEMENTS

- Header (indigo wordmark), hero headline + the **one allowed subtle indigo gradient**, checkout preview.
- 3-step how-it-works, "secured by Paystack / we never hold your money" trust strip, footer.

A11Y

- Single H1 in hero; gradient is decorative behind real text that meets contrast on its own.

Gradient note: the marketing hero carries the single subtle indigo gradient permitted brand-wide (#F5F4FF → #EEEDFE → #E6E4FF). The product app stays flat — no gradients in-app. The dark trust strip uses --spring-green icons as legitimate secondary-brand expression on an indigo-ink surface.
